

Bandari Harish

Objective

Utilizing my knowledge and experience as a frontend web developer, I want to develop attractive and user-friendly user interfaces for websites and web applications while also continuing to learn new things and keep up with growing web technologies.

Experience

- **Mini Project:** Calculating Persons Age
A Web-Page to calculate the age of a person by taking the date of birth as Input and display the person's age
- **Major Project:** Creating a Weather Report Website
A Web App for the Users to see the Current Weather and Weather Forecast for the next 7 day
- **Project for Atal Tinkering lab**
Created a website for Atal Tinkering lab
- **Young Mentor in Atal Tinkering Lab (Web Development)**
- **Portfolio website**
a website that contains about information about myself and project links
- **Internship:**
Did Internship in Web Development (Smart Kowner)
